

Iain Patterson

Former Dir. of Common Technology Services, GDS, UK; Chief Digital Officer at UKCloud Health

Iain Patterson is currently Chief Digital Officer of UKCloud Health. Before joining UKCloud in July 2017, he was Director of Common Technology at Government Digital Service, where he was responsible for working with departments to provide the right technology that helps the public sector deliver great services.

Iain Patterson is an experienced business professional with a reputation for strong leadership and proven delivery within challenging environments and diverse sectors. His international exposure encompasses the Middle East, Far East, Australia, Europe and the Americas. He has particular ability in the development and direction of high profile turnaround strategies and IT projects, including the most significant in the UK's recent history: the London 2012 Olympic and Paralympic Games, with a budget exceeding £7.4bn. Iain Patterson led the effort to rescue the failing IT operation for London 2012, achieving full delivery more than 3.5 months ahead of schedule. His team created all aspects of the Information Management Operation model and strategy, building a 'best practice' solution for the £7.4bn Design & Construction Programme.

His specialties include Business Turnaround and Process Re-engineering, Strategic IT Planning, Transformation and Re-Alignment, Stakeholder Relationship Development and Engagement Models, Third Party Contract and Vendor Management, Outsourcing, Building High Performing Teams, ecommerce and CRM via emerging technologies, ITIL, Coaching and Mentoring.
